

# MOHAMED MUBARAK ELHASSAN AHMED

Architect | Urban Designer | Site Engineer | Finishing & Fit-Out Project Manager

[+966530083814](tel:+966530083814) | [I.planeet.sa@gmail.com](mailto:I.planeet.sa@gmail.com) | Saudi Arabia

Transferable Saudi Iqama | [MOHAMED EL-HASSAN](#) | [LinkedIn](#)

Architect with experience spanning 8 years in architectural design and project delivery across Saudi Arabia and Sudan. Combines architectural and urban design skills with practical expertise in interiors, site supervision, and finishing management. Skilled in quantity take-offs, material planning, quality control, and consultant coordination. Former Finishing Department Manager, currently managing freelance government refurbishment, residential finishing, and commercial fit-out projects. Proficient in architectural CAD, 3D modeling, and visualization, with the ability to translate design requirements into practical site solutions.

## Key Achievements

---

- **Freelance Project Delivery:** Managed 5 freelance projects covering government refurbishment, residential villa finishing, and commercial fit-outs.
- **Material Optimization:** Reduced material waste by approximately 10% through accurate quantity take-offs and coordinated material planning.
- **Quality Control:** Reduced finishing rework by approximately 10% through regular inspections and early correction of workmanship issues.

## Professional Experience

---

### Freelance Architect | Project Management & Site Supervision

Self-Employed | Saudi Arabia

Mar 2026 – Present

- **Project Coordination:** Manage freelance renovation and finishing assignments, coordinating project requirements and site activities across government, residential, and commercial work.
- **Government Refurbishment:** Oversee renovation works within prison facilities, coordinating execution around the requirements of each assigned project.
- **Residential Finishing:** Supervise villa finishing works, aligning site execution and finish quality with client expectations.
- **Commercial Fit-Out:** Coordinate finishing works for retail premises, translating client requirements into practical interior solutions.
- **Site Follow-Up:** Monitor work progress and address execution issues to keep project activities aligned with the agreed scope.
- **Client Communication:** Maintain direct communication with clients to clarify requirements, discuss progress, and resolve project decisions.

### Finishing Department Manager

Rakaez Al-Sharq Al-Awal | Khafji, Saudi Arabia

Feb 2023 – Feb 2026

- **Department Leadership:** Managed finishing department operations, coordinating site activities and resources against project schedules and quality requirements.
- **Quantity Take-Offs:** Calculated material quantities to support accurate purchasing requirements and effective resource allocation.
- **Site Supervision:** Monitored field execution against project drawings and specifications, identifying discrepancies and coordinating corrective action.
- **Quality Control:** Reviewed finishing workmanship and addressed execution issues to maintain consistent standards across site activities.

- **Consultant Coordination:** Liaised with consulting offices to clarify specifications, resolve technical queries, and communicate requirements to site teams.
- **Work Planning:** Organized finishing activities and followed up on progress to support coordinated project delivery.

#### Events Content Coordinator

Sudanese Architecture Courses Center | Sudan

2019 – 2021

- **Content Planning:** Developed event themes and content plans aligned with the center's objectives and audience.
- **Presentation Development:** Prepared presentations, visual materials, and promotional content to communicate architectural topics clearly.
- **Visual Communication:** Applied architectural and graphic design skills to create consistent event advertising and branded materials.

#### Architect / Interior Designer

OGZA Studio | Sudan

2018 – 2020

- **Urban & Interior Design:** Developed urban design proposals and interior layouts that aligned spatial functionality and aesthetics with client requirements.
- **Furniture Design:** Created customized furniture concepts tailored to interior layouts and user needs.
- **Design Communication:** Produced architectural visualizations, videos, and graphic materials to communicate design concepts and support client presentations.

#### Architect

Lili Studio Architectural Engineering | Sudan

2018 – 2019

- **Architectural Design:** Developed interior and exterior design solutions that balanced functionality, aesthetics, and a cohesive architectural character.
- **Material Selection:** Selected materials suited to project requirements and design intent.
- **Digital Design & Presentation:** Used architectural software to develop designs and produce video presentations for client discussions.
